## Views

### Unique visitors

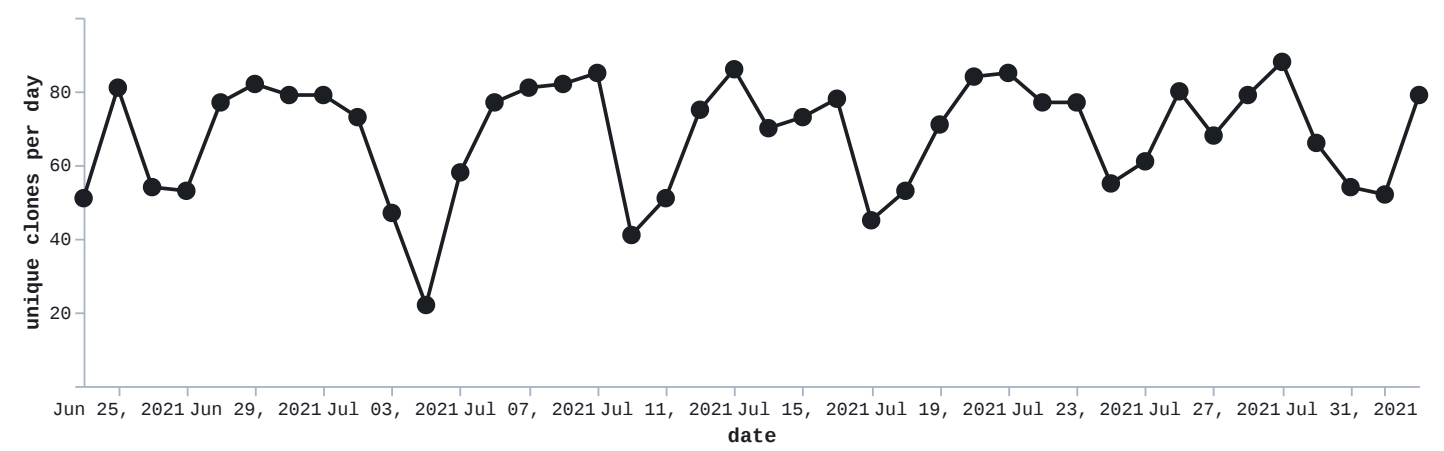

### Total views

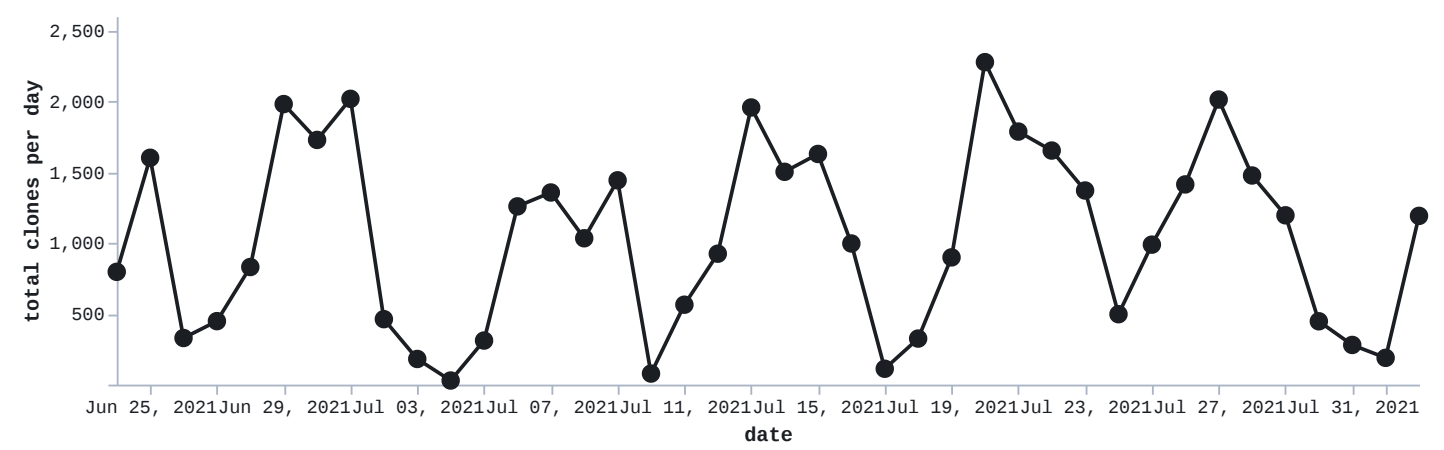

# Clones

Unique cloners

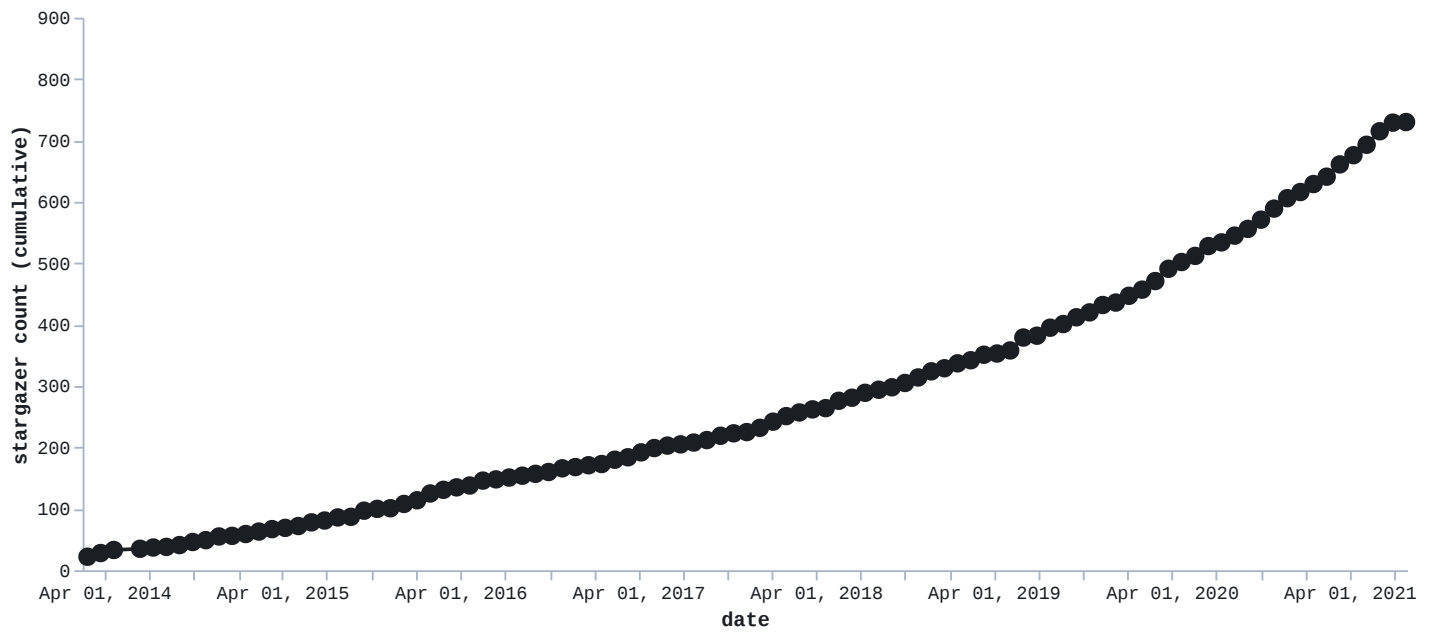

Total clones

# Stargazers

---

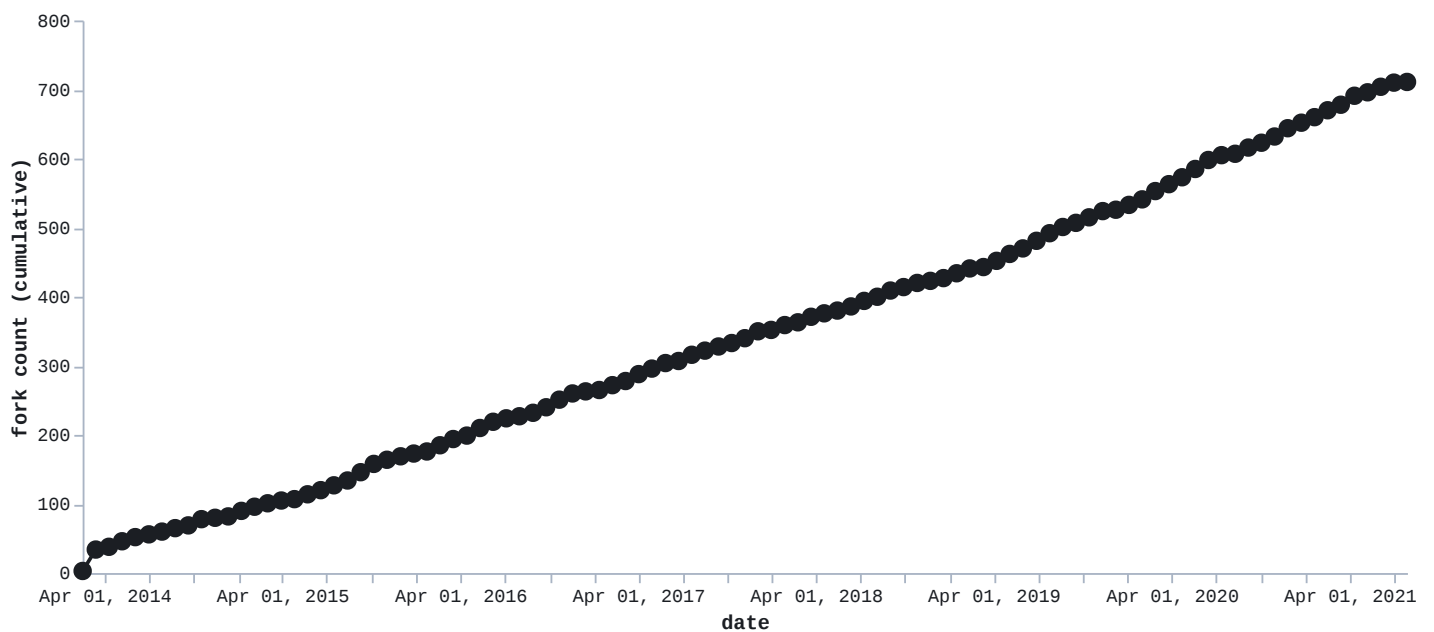

Each data point corresponds to at least one stargazer event. The time resolution is one day.

# Forks

---

Each data point corresponds to at least one fork event. The time resolution is one day.

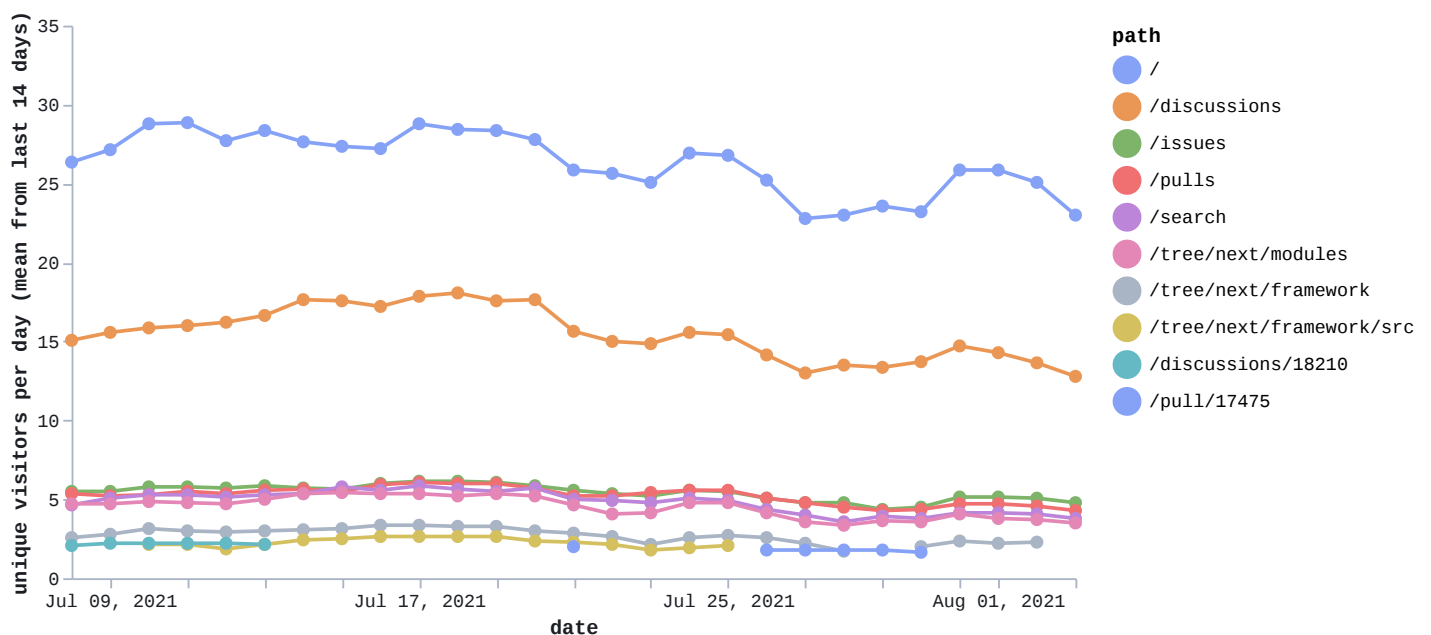

Note: Each data point in the plots shown below is influenced by the 14 days leading up to it. Each data point is the arithmetic mean of the “unique visitors per day” metric, built from a time window of 14 days width, and plotted at the right edge of that very time window. That is, these plots respond slowly to change (narrow peaks are smoothed out).

The chart displays the daily mean number of unique visitors from the last 14 days for ten different referrers. The x-axis represents the date from July 9, 2021, to August 1, 2021. The y-axis represents the unique visitors per day, ranging from 0 to 18. The referrers are: Google (blue), mooseframework.inl.gov (orange), github.com (green), moose.inl.gov (red), groups.google.com (purple), civet.inl.gov (pink), cn.bing.com (grey), pages.nist.gov (yellow), Bing (teal), and com.google.android.gm (light blue). Most referrers show a significant increase in visitors starting around July 17, 2021, with 'Google' and 'mooseframework.inl.gov' showing the highest peaks. 'moose.inl.gov' shows a more stable, lower level of visitors throughout the period.

date	Google	mooseframework.inl.gov	github.com	moose.inl.gov	groups.google.com	civet.inl.gov	cn.bing.com	pages.nist.gov	Bing	com.google.android.gm
